Energy Spin

Svakodnevna ušteda

"Delotvorno otapanje deterdženta što olakšava pranje tako da se energija štedi ne samo za Eco program, već i za druge svakodnevne programe. Sa ovom novom tehnologijom pranja, Beko mašine za pranje veša će uštedeti energiju do 35% za često korišćene programe* u poređenju sa tradicionalnim uređajima, bez ugrožavanja performansi pranja. * Cottons, Synthetics, Xpress/Super Express, Delicates, Mix, Handwash, Wool, Darkcare, Outdoor/Sports, ColdWash, 20°C, Drum Clean, and Downloaded Programs"

ProSmart Inverter Motor

High efficiency, high durability, low noise

Don't stress about your energy bill or give yourself a headache every time you wash your clothes. Thanks to a brushless motor design, ProSmart offers energy efficiency, lower sound levels and higher durability – all in a single machine. All so you get the most from your washing machine without disturbing your monthly budget or piece of mind.

SteamTherapy Programme

Less wrinkled clothes, shorter ironing time

Here's some good news for those with a heap of not-so-dirty but all-wrinkled-up clothes in their bedrooms. SteamTherapy Programme tumbles up to 1 kg of dry clothing with intense steam injection to reduce wrinkles up to 58%*, reducing ironing time, in just 15 minutes. That's probably shorter than neatly folding and putting away all those clothes. *Tested by 3rd party laboratories

RecycledTub

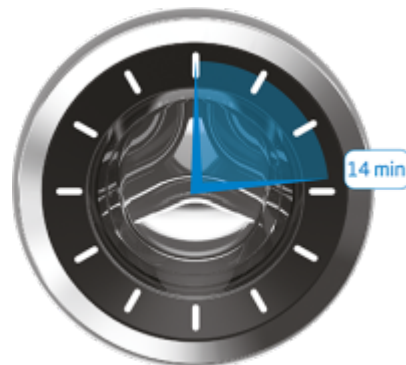

Mašina za sušenje veša RecycledTub

Dizajnirane da smanje zagađenje plastikom, naše mašine za sušenje veša RecycledTub koriste reciklirane plastične flaše u svojim kadama. Korišćenjem recikliranih plastičnih boca koje se pretvaraju u izdržljiv materijal visokih performansi, Beko preduzima male korake kako bi smanjio ugrađeni ugljenični otisak proizvoda, istovremeno minimizirajući upotrebu čiste plastike. Jer zdravija planeta znači i zdraviju budućnost.

Super kratki program Xpress od 14 minuta / Program Daily Xpress

2 kg čistog veša za 14 minuta / Pranje pune mašine veša za 28 minuta

Nije za svu odeću potrebno intenzivno pranje. Ponekad je dovoljno i kratko pranje. Super kratki program Xpress od 14 minuta omogućava pranje do 2 kg veša za samo 14 minuta. 2 kg možda ne deluje kao puno veša, ali to je čak 20 majica! To znači da ćete biti spremni za polazak za tili čas. / Ako vam se čini da je potrebna čitava večnost da mašina završi pranje veša, isprobajte program Daily Xpress. Sa programom Daily Xpress možete da operete punu mašinu veša za samo 28 minuta, na temperaturi od 30 °C. Veš će biti opran pre nego što završite gledanje one polusatne epizode serije koju nikako da odgledate.

StainExpert Programme

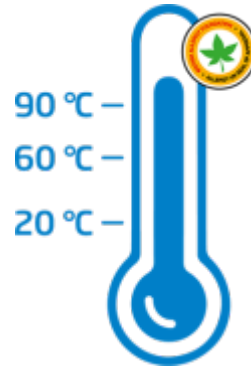

Besprekorno čišćenje za 24 vrste fleka

Više ne morate da koristite belo sirće, limunov sok i deterđent za sudove. Njima je mesto u kuhinji, a za odeću sa flekama će se pobrinuti program StainExpert™ vaše mašine za pranje veša. Bilo da je u pitanju kafa, kečap, čokolada, šminka ili krv, StainExpert™ je specijalno dizajniran da eliminiše 24 različite vrste fleka, pa više nećete morati da tretirate fleke pre pranja odeće.

Hygiene+ Programme

Vrhunski higijenski rezultati pri svakoj temperaturi

Osobe sa alergijama odlično znaju da neke grinje i bakterije mogu ostati na odeći čak i nakon pranja. Program Hygiene+ objedinjuje osetljive komande za temperaturu sa dodatnim ispiranjem i centrifugom kako bi se ovi mikroorganizmi odstranili iz veša. Temperaturni raspon je od 20 °C do 90 °C, a organizacija Allergy UK je potvrdila da se ciklusom pranja na 60 °C eliminiše 99,9% alergena.

Fast+

Up to 55% faster cleaning

If you think life is too short to sit around and wait for the washing machine to be done, here's something to get back time. The Fast+ function senses the type of fabric and the amount of clothes automatically, optimizing the washing programme and letting you reduce programme duration up to 55%* at the touch of a button.

* Tested by internal laboratories

GentleCare Programme

Gentle cottons looking like new for longer

Some cottons are gentler than others and they need to be treated as such. The GentleCare Programme protects the texture and colour of delicate fabrics like woven and combed cotton thanks to its gentle washing and spinning algorithm. Now you can throw your fine cottons in the machine without a worry and enjoy them for longer.

AntiCrease

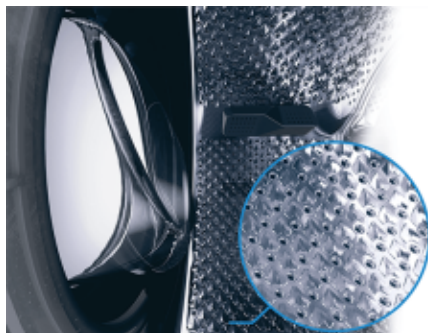

Wrinkle-free laundry

If ironing is not your favourite chore (is it anyone's?) meet the AntiCrease function powered by IonGuard technology. It tumbles the drum periodically at the end of the cycle to keep clothes fresh and wrinkle-free. That's less ironing for you so you can do more of what you love instead.

DrumClean+ Programme

Clean & fresh drum

After you've run the machine enough times, that drum begins to smell a bit from all the humidity. DrumClean+ programme powered by AirTherapy technology circulates additional warm air to remove any odours and deep-clean the drum. Remember, a clean drum means cleaner clothes, cycle after cycle.

AquaWave

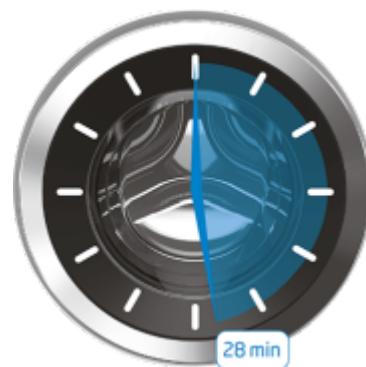

Wave-like drum action for gentler treatment

Washing might take its toll on your clothes. So, here is AquaWave system's curved door glass and specially designed paddles that move the laundry in a wave-like action inside the drum, treating clothes gentler and improving the washing performance. Next time someone compliments your clothes and you reply, 'What, this old thing?' you might be telling the truth.

Daily Xpress Programme

Full capacity cleaning in 28 min

If it feels like ages for the washing machine to finish, try the Daily Xpress Programme. Daily Xpress lets you wash a full load of laundry in just 28 minutes, at 30 °C. Your laundry will be done before you can finish that half-an-hour comedy you've been meaning to catch up on.

Outdoor / Sports Programme

Protection for waterproof fabrics

If you're an outdoor or sports person, you know that proper clothing is part of the investment, just like other equipment. The Outdoor / Sports Program's low tumbling action prevents friction within the drum, helping your clothes preserve their waterproof features and breathability. Now go out and enjoy the adventure.
