HarvestFresh

Inspirisan prirodom, pokrenut svetlošću

Vitamini u voću i povrću se više ne gube u frižideru! HarvestFresh tehnologija u 3 boje oponaša 24-časovni ciklus sunca unutar posude, čuvajući vitamine duže. Ova jedinstvena tehnologija u vašem frižideru će vam omogućiti da uživate u hranljivim obrocima i zdravijem načinu života.

Kompresori sa VDE sertifikatom

Naši kompresori, koji su sertifikovani od strane VDE, obezbeđuju svežinu vaše hrane uz dokazanu pouzdanost tokom 25 godina.

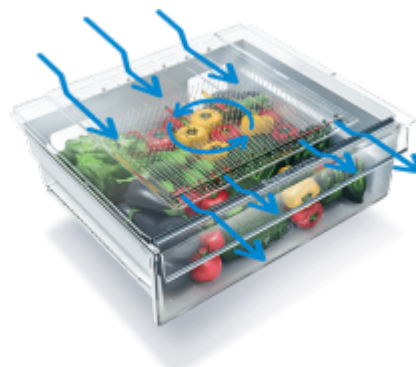

Iskusite vrhunsku inovaciju u oblasti Beko rashladnih uređaja, gde su najsavremenija tehnologija i trajni kvalitet naša prednost. Naši frižideri su opremljeni inverter kompresorima koji su detaljno testirani i sertifikovani od strane VDE za životni vek od 25 godina. Ovi kompresori su kamen temeljac funkcionalnosti našeg frižidera, pažljivo dizajnirani da održavaju optimalno okruženje za hlađenje. Uz Beko, ulažete u frižider koji je napravljen za dugovečnost i dizajniran da održava svežu hranu iz dana u dan.

EverFresh+

Up to 3x longer freshness

Your fresh groceries don't need to go bad every again. Precise temperature and humidity controls minimise condensation in your crisper, keeping your fruit & veg fresh for up to 3 times longer so you have all the healthy ingredients whenever you need them.

NeoFrost Dual Cooling

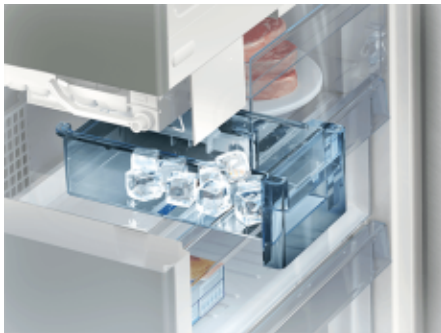

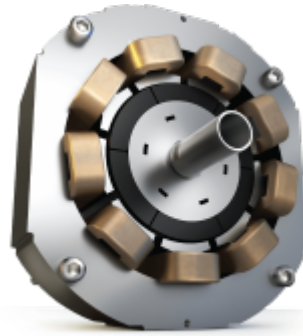

2 separate cooling systems, no odour transfer

It's difficult to keep the fish in the freezer together with a flavourful cake in the fridge without their odours mixing. NeoFrost Dual Cooling's separate cooling systems for each compartment maintain ideal air flow and optimal temperatures in both the freezer and the fridge. As a result, food stays fresh for longer with no frost build-up or odour transfer.

ProSmart Inverter Compressor

High efficiency, high durability, low noise

If your fridge is a humming, gurgling energy-hog, it's time to make the switch. Thanks to its innovative design, the ProSmart Inverter Compressor provides faster cooling with less energy and four times quieter operation than average refrigerator compressors. It adapts to temperature fluctuations quicker, keeps food fresh longer and saves on your energy bills, all at the same time.

FastIce

Ice in 40 minutes

Don't wait hours to get the party started again when you run out of ice. Thanks to an additional fan attached to the ice machine, FastIce makes 100 g of ice in just 40 minutes, which would take 2 hours with a standard freezer. So, you'll be ready for last-minute get-togethers any time.

CoolRoom

Meat, fish & dairy fresher for longer

Meat, fish, and dairy need lower temperatures to stay fresh. The CoolRoom compartment keeps these products at just above freezing temperatures and maintains optimum humidity. That way, food remains fresh and full of flavour for up to twice as long.

Safety Glass

High-durability glass shelves

Ease your worries of putting that huge and heavy pot in the fridge with Safety Glass. Safety Glass shelves are made up of tempered glass and can carry loads of up to 25 kg. They resist cracks and scratches much better than un-treated glass, so you can store heavy items without a care.

Vacation Mode

Extra energy saving

Get your fridge in the holiday spirit when you leave for vacation. Vacation Mode saves energy by shutting down the cooler section but keeping the freezer running. Frozen food will be preserved while you save on energy bills.
