Led Illumination

Clear view of the inside

It can be tricky to see everything in your fridge, especially in the corners and at the back of selves. Led Illumination features chains of LED on the top of the fridge, and for every shelf on the side wall so you can see clearly throughout the cooler. It's more energy-efficient than standard lighting too.

MinFrost

Minimum frost build-up

Frost build-up in static fridges makes food stick together and the appliance consumes more energy. Thanks to MinFrost's special evaporation system, ice build-up in the freezer is dramatically reduced. That means frozen food will be preserved better and with less energy, while you'll need to defrost less frequently.

Reversible Door

Adjustable door direction to fit your kitchen layout

Some kitchen layouts require that refrigerator doors open in one direction and not the other. Reversible Door allows door hinges to be placed on both the left and the right of the unit, so decide which way your fridge doors open. Plus, you can double your cooling capacity by placing two fridges side by side and reversing the doors of one.

Safety Glass

High-durability glass shelves

Ease your worries of putting that huge and heavy pot in the fridge with Safety Glass. Safety Glass shelves are made up of tempered glass and can carry loads of up to 25 kg. They resist cracks and scratches much better than un-treated glass, so you can store heavy items without a care.
