

HP All-in-One 24-cb1069ny Bundle All-in-One PC (7Y0P1EA)

Pregled

Work hard. Enjoy hard.

The HP All-in-One blends the power of a desktop with the beauty of a modern display. Powered by an Intel® processor[1], bring the cinema to you with a three-sided micro-edge, Full HD[2] display and dual speakers. This AiO design includes sustainable materials[3] and is designed to keep your space clutter-free with thoughtfully placed ports.

Fast performing with ample storage

Get things done easy and fast with the performance of an Intel® processor[1], and ample storage space.

Made with the planet in mind

Our AiO design includes sustainable materials like ocean-bound plastic[3] and post-consumer recycled plastic[4].

Immersive Full HD entertainment

Enhance your viewing experience with FHD[2] crystal-clear images from any angle on a 3-sided micro-edge display.

A dynamic processor that adapts to you for superior multi-tasking performance

12th Gen Intel® Core™ processors distributes performance where you need it the most — saving you time and increasing your ability to do the things you actually want.^[5]

FHD IPS touchscreen

Always see your content at its best with 178° wide-viewing angles and a vibrant picture. And with touchscreen technology, you can control your PC right from the screen.^[2]

Flicker-free

Using DC Dimming technology that controls brightness by adjusting direct current rather than cycling the backlight, we can eliminate screen flickering for more comfortable viewing.^[7]

Built to last

Life can be unpredictable, but your HP desktop shouldn't be. Backed by over 230 individual tests, our desktops go through it all to deliver durability you can trust and reliability you can count on.^[6]

Anti-glare panel

Enjoy the sun and your favorite content with this anti-glare panel. Non-reflective and low gloss means you'll get less glare while you're outside.

Sustainable design

Because little things make a big difference, this product includes sustainable materials like ocean-bound plastic and post-consumer recycled plastic in the design.^[8]

[1] Multi-core is designed to improve performance of certain software products. Not all customers or software applications will necessarily benefit from use of this technology. Performance and clock frequency will vary depending on application workload and your hardware and software configurations. Intel's numbering, branding and/or naming is not a measurement of higher performance.

[2] Full high-definition (FHD) content is required to view FHD images.

[3] PCs manufactured with recycled ocean-bound plastic material in product speaker enclosures. Percentage of ocean-bound plastic contained in each component varies by product.

[4] Percentage of post-consumer recycled plastic contained in keycap varies by product.

[5] Multi-core is designed to improve performance of certain software products. Not all customers or software applications will necessarily benefit from use of this technology. Performance and clock frequency will vary depending on application workload and your hardware and software configurations. Intel's numbering is not a measurement of higher performance.

[6] HP Total Test Process testing is not a guarantee of future performance under these test conditions. Damage under the HP Total Test Process test conditions or any accidental damage requires an optional HP Accidental Damage Protection Care Pack.

[7] The flicker-free capability eliminates screen flickering through integrating DC-dimming LED backlights.

[8] Percentage of ocean-bound plastic and post-consumer recycled plastic varies by product. Recycled plastic content percentage is based on the definition set in the IEEE 1680.1-2018

standard.
