YOUR HOME**

**GORENJE
DEHUMIDIFIERS**

It is important to feel good at your home. Gorenje humidifiers enables smart control over humidity level and contributes to a higher quality of the indoor air. Optimized airflow system ensures silent and comfortable operation, and the ionic technology keeps the air clean, fresh and healthy. Thanks to their clean and practical design they can be put anywhere in the room.

FEEL MORE COMFORT AT YOUR HOME

SMART FUNCTIONS

Self-diagnosis and auto protection

Automatic defrosting prevents freezing of the evaporator and enables dehumidification at low outdoor temperatures. Automatic restart is a great feature in a case of a power failure. When the power supply returns, dehumidifier automatically reverts to the previous mode of operation. Smart dehumidifier also automatically detects leakage of refrigerant and switches off the device.

	TOO DRY			JUST RIGHT			TOO WET		
Bacteria	[Light Blue]			[Medium Blue]			[Dark Blue]		
Viruses	[Light Blue]			[Medium Blue]			[Dark Blue]		
Fungus, mold	[Light Blue]			[Medium Blue]			[Dark Blue]		
Mites	[Light Blue]			[Medium Blue]			[Dark Blue]

SMART DEHUMIDIFYING

Auto set humidity level

Dehumidifier can take that damp feeling out of a basement or laundry room and prevents a few other sticky situations: humidity levels above 50% can breed dust mites, mildew, and mould, triggering allergies or other health problems. Our dehumidifier automatically sets the humidity level between 45 and 55% of relative humidity, depending on the actual temperature in the room.

LED CONTROL PANEL

User-friendly controls

Electronic controls let you select between three modes: SmartDry, continuous dehumidifying and SmartDemumidifying. You can set the timer for up to 24h and choose between three speeds of a fan. With the down and up buttons, you can set the humidity level between 35% of relative humidity to 85% of relative humidity. Settings are clearly shown on a LED display.

SMART DRY

Faster drying of your clothes

Dehumidifier can be used to dry clothes very easily. You simply place the appliance in a room where you can hang the wet clothes. Choose SmartDry function and high-speed fan will dry your clothes in no time. Clothes will be soft, not rough and stiff like they are when drying over a source of heat. Performance is adjusted to the actual humidity and temperature in the room. Maximum operation time for this function is 10 hours.

FRIENDLY TO YOU

Portable and super silent

4 casters allow easy transport and an increased portability. Handles on both sides of dehumidifier will help a lot. Ideal for all who want the ability to move dehumidifier about freely. But because of super silent operation you won't even mind having it in the room.

AUTO SHUT OFF

No spilling

The condensate bucket has a volume of 3 L. When the condensate bucket is full, dehumidifier will automatically shut off and you will see the P2 code on the display. Furthermore, there is a direct hose connection which lets you divert the condensed water directly to the drain, so you don't have to empty the bucket. A pump can also send water up through a window, to a slop sink to your garden etc.

TECHNICAL CHARACTERISTICS:

MODEL	D16M OptiAIR	D20M OptiAIR
Product code	734859	734860
Capacity (L/24 hours)	16	20
Power (W)	350	440
Timer	Yes	Yes
Turbo operation	Yes	Yes
Drying function	Yes	Yes
Nominal current	2 amp	2.1 amp
Area of use (m ²)	29-44	37-52
Humidity range (%)	35-85	35-85
Automatic defrost	Yes	Yes
Automatic operation	Yes	Yes
Automatic restart	Yes	Yes
Full tank indicator	Yes	Yes
Suspended gas detection	Yes	Yes
Automatic switch off	Yes	Yes
Dimensions (W×H×D)	35 × 51 × 24.5 cm	35 × 51 × 24.5 cm
Weight (kg)	14	14.4
