

Bright & beautiful images

Say goodbye to low-quality picture, dead pixels, and other annoying issues you had to deal with! Whether you use the monitor for work or fun, it's time to enjoy great color accuracy, contrast and viewing angles, thanks to quality IPS and VA panels. For an improved work experience, this series also boasts built-in speakers.

Exceptional strength

While designing new Tesla monitors, we've focused on premium materials. Screen frame and monitor stand are made of aluminum alloy: apart from exceptional strength and sturdiness, this design also adds to the sophisticated look of the device.

Impressive design

Aside from high-quality features, Tesla monitors are designed to bring elegance into your every working day. They're super slim, beautifully crafted, and made to fit any contemporary work environment; grey models from this series also have a new type of stand, shaped like a tree branch.

An instant connection

With Audio Output, you can easily plug your headphones (or speakers) directly into the monitor, enjoy undisturbed work and avoid issues with short cables. This model also has HDMI and Type C ports, so it's easy to connect the devices you need.

Not gaming monitors, but...

... you can still use them to have fun! Try some easy gaming and enjoy Adaptive Sync compatibility, quality picture, as well as great response time.

User-friendly

Keep it simple with intuitive user interface and fast access to all settings. Change inputs or predefined image parameters with just a couple of clicks, switch languages, or adjust other elements according to your needs.

DISPLAY
