OMEN X 27 HDR QHD 240Hz Gaming Monitor

Play at your full potential on a monitor that delivers frames at full-throttle speed. From edge to edge, this 240 Hz[1] monitor brings visuals to the next level, with HDR technology that delivers details and contrast like you've never seen before, so you're ready to react fast, return fire, and rank up.

Lightning-fast refresh rates
Outpace your opponent with a 1ms response time and 240Hz refresh rate[1], 4x faster than traditional 60Hz monitors. QHD resolution offers exceptional visual quality, twice the pixel density of FHD monitors. This means less blur, smoother gameplay, and the ability to react faster to all the action all with ultra-sharp graphics.

Crystal-clear gaming
Gamers deserve to have smooth gaming combined with the brilliant pixel quality high-dynamic range rendering offers. AMD Radeon FreeSync2™ HDR Technology[2] gives you low latency, wide adaptive refresh rate ranges, and Low Framerate Compensation.

Gaming is in the details, don't miss any
This monitor features HDR technology that provides a range of luminance that delivers vivid details and lifelike contrast between colors. View the brightest of whites and the darkest of blacks for in-game details like you've never seen before. The DCI P3 90% color gamut[1] and profound luminance give you that realistic feel you crave.

OMEN X 27 HDR QHD 240Hz Gaming Monitor

Featuring

DCI-P3 color space
Get deeper hues and more accurate colors with a wider color gamut than sRGB. DCI-P3 90% closely represents colors on displays as they are in the real world.

240Hz refresh rate
Reduce frustrating lag and image ghosting with a lightning fast 240Hz refresh rate and a 1440p QHD resolution for smooth, crisp gameplay.

Console connectivity
Easily connect to your PC, gaming console and peripherals for big screen entertainment with a broad range of ports, including HDMI, 1 Display port and 2 USB.

AMD® FreeSync™ 2 HDR
See and feel the difference of fluid, responsive HDR gameplay. Synchronize the refresh rate with your GPU, making display stutter, input lag, and screen tears ancient history.

OMEN Command Center
OMEN Command Center puts you in control, allowing you to optimize and customize your display, performance and lighting settings—all to meet your needs.

High dynamic range compatible
HDR compatibility means HDR games and movies appear vivid and colorful, with enhanced contrast on your HDR display. More accurate colors provide a more lifelike visual experience.

Height adjustment stand
Easily adjust your display to the most comfortable position with 130 mm range of travel.

[4] HDR (High Dynamic Range) Content is required to view HDR images. Requires a monitor and AMD Radeon™ graphics, both with FreeSync support. See www.amd.com/freesync for complete details. Confirm capability with your system manufacturer before purchase. GD-127.
